

Each year, DOORWAYS assists  
3,000+ individuals and family members  
who are battling homelessness, poverty, and illness  
from HIV. We offer five forms of subsidized housing that  
are enriched with 360 degrees of resources to stabilize  
and advance participant independence & opportunity!

**Serving unhoused people living with HIV since 1988.**

# REJECT FEDERAL FUNDING CUTS TO HIV SERVICES & HOUSING!

**DO YOU KNOW WHO WILL SUFFER FROM THESE CUTS?**

**The homeless and people living in poverty!**

HIV cases can be **3 times higher** in **homeless** populations compared to the general population—with up to 62% of mentally ill homeless people becoming HIV-positive.

(<https://nhchc.org/wp-content/uploads/2019/08/AIDS-Homelessness.pdf>)

People with zero income or income below the federal **poverty** level are **twice as likely** to become HIV+ compared to those living above the poverty line.

(<https://www.americanprogress.org/article/poverty-is-driving-an-hiv-epidemic/>)

**HIV CAN BE STOPPED.** It is preventable and treatable with stable **SUPPORTIVE HOUSING** where people can manage their **HIV medication regimen** and access key resources, such as medical care, counseling for mental health and/or substance use challenges, care coordination, etc.

Daily compliance can render the virus **Undetectable** and **Untransmittable**, opening the door to the end of HIV in future generations!

**DO YOU REMEMBER?** In his 2019 State of the Union address, President Trump launched “Ending the Epidemic: A Plan for America” (<https://www.cdc.gov/ehe/php/about/goals.html>). He directed vital funding to prioritizing HIV diagnosis, treatment, and prevention.

**PLEASE FIGHT TO RETAIN FUNDING FOR HIV PROGRAMS AND HOUSING TO HELP END THIS PUBLIC HEALTH EPIDEMIC!**
